What's new:

Reverse x Reverse Original Soundtrack is a CD reissue of the 1993 studio album Reverse by the American alternative rock band The Smithereens. It was released by True North Records on September 7, 2005. It is a one-disc reissue with three bonus tracks, and also two bonus videos directed by the band. It was the first Smithereens release since the group's disbanding in 2000 and also the last for a long time. Critical reception In a review for AllMusic, Stephen Thomas Erlewine wrote that Reverse Original Soundtrack features "a dozen tracks that could be tossed into an ideal mash-up, and should be (a few are better than the original LP, in fact), but most of them just sound like filler while some of the best songs on this reissue now loiter even after the others have passed." In her Track By Track review for PopMatters, Kaye Herron wrote that the music is "still pretty decent and feels like an essential addition to any music collection, regardless of what I might think of the group's songs a few years down the line."
