Infect other players through touch, be it by shooting them in the head or by rubbing your head against their head to infect them. Zombies will come in waves from time to time, so you better stay alert and be ready for any eventuality! About The Game STEINS;GATE: An unparalleled celebration of sci-fi, STEINS;GATE is a philosophical sci-fi mystery that imagines a possible future where humanity has finally solved its most pressing problems: the purpose of life. You play as a member of "Tauriq", a group of specialists who have the power to time travel using an advanced form of "time nodes". A team of scientists known as "SERN" are developing a time machine powered by the Large Hadron Collider (the world's largest particle accelerator) in Switzerland, and your task is to prevent them from creating a disaster that will change history, allowing them to take their machine out of the park. Through your efforts to save time, you'll learn the true purpose of your existence, and uncover what the future holds. What's new in Desert Gunner:

⌃ Playbooks can and do change, so do read the descriptions on the Godmaster's page to get the most up-to-date information, then read the actual rulebook to get the exact wording. Official FG Site: Playbooks.php Playbook reference: Sh3d: The Breath of the Goddess/Book 1 At first glance, Sh3d may seem like a normal SH based on the master's and disciple's names. However, it's far from a normal game in that the playbooks and additional information found on the FG site can really help out with gameplay and understanding of the setting. Basic Description: SH3 is a semi-pseudo-cooperative, exploration and combat focused game. Within a city, there are different areas of activity such as temples, palaces, markets, etc. Within this, each character has a limited range of actions which can be executed via four different skill trees, which can be used to do anything from combat to arcane manipulation and beyond. Terms: This game may sound familiar to anyone who played in our Age of Building contest, as there are links between the two games. SH3 is a remake of one of those two games. We would like to thank the Genesys staff for creating such a great game, and assisting us in creating Sh3. As such, there is a few updates for anyone who may have already completed one of the entries, that will be used by Sh3 and is applied to your accounts. There is no back-breaking grinding to get players involved. It's in the background, so you won't ever see a long wait for a battle to start. There are no mandatory activities, but if you want to get involved in anything, you have the option to join. You will not have to use the backpack. Each character will have a set number of books needed to actually advance in the game. While the rest of the city (and the world) may grow in size, there is no growing pain which will impede your progress in the city. Costs: The price to play Sh3 is the same as playing a PC game of similar genre; $10.00 USD. However, if you wish to donate to our efforts to run these games, you are encouraged to do so at our website. Admins: There are two senior playwrights, Lord Ariakas and Lord
